SATISH SHRESTHA

Full Stack Developer (MERN) | Aspiring Intern / Junior Developer

Kathmandu, Nepal | satish020820@gmail.com | +977-9861282976 | github.com/Satish0802

PROFILE

Motivated full stack developer with hands-on experience building web applications using the MERN stack and Django. Eager to contribute to real-world projects and grow through practical, team-based development.

SKILLS

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, TypeScript / JavaScript (ES6+)
Backend: Node.js, Express.js, Python, Django, REST API Design, JWT Auth, bcrypt, Cookies
Database: MongoDB, Mongoose, SQL (PostgreSQL / SQLite)
Tools & Workflow: Git, GitHub, Nodemon, npm, dotenv, cors, ESLint, VS Code
Soft Skills: Critical Thinking, Effective Communication, Team Collaboration, Time Management

MERN STACK TRAINING & PROJECTS

February – June 2026

Full Stack Web Development (MERN Stack) from Broadway Infosys — Certificate of Completion

- Completed a structured MERN stack training programme covering MongoDB, Express.js, React.js, and Node.js
- Gained practical experience with API integration, Git version control, and modern development workflows
- Applied learnings directly in personal and academic projects hosted on GitHub

Carbon Ledger — *Personal Project* carbon-ledger-phi.vercel.app
Stack: Next.js, TypeScript, PostgreSQL, IPCC AR6 Emission Factors

- Built a personal carbon emission tracker using IPCC AR6 emission factors for accurate, science-based calculations
- Implemented secure user authentication with email/password sign-in and account registration along with google login
- Developed an interactive dashboard to log and visualize individual carbon footprints
- Designed to promote environmental awareness through real-time data tracking

ACADEMIC PROJECTS

Recipe Website (Team Project)

- Developed with Django and Python to manage user-submitted recipes
- Built a responsive UI using a component-based structure
- Implemented CRUD functionality for recipe creation and management

Vehicle Rental Website (Team Project)

- Built a booking platform using Django and relational databases
- Managed real-time vehicle availability and rental history tracking
- Designed a streamlined UI for vehicle browsing and reservations

Inventory Management System

- Built using Django for easy integration and a responsive dashboard for inventory oversight
- Added extra features such as bill printing for convenience

EDUCATION

Bachelor of Computer Application — Lumbini Academic College *2020 – 2026*
